WHAT IS CLAIMED IS:

1	1. A computer implemented method for managing a stability study, the				
2	method comprising:				
3	generating one or more interfaces for the stability study, wherein the one or				
4	more interfaces define requirements for the stability study;				
5	displaying the one or more interfaces;				
6	receiving input information for the one or more interfaces, the received input				
7	information for fulfilling the requirements; and				
8	validating the received input information against business rules to determine if				
9	the input information is acceptable.				
1	2. The method of claim 1, further comprising if the input information is				
2	ecceptable, storing the input information.				
	a control of the first than commissing.				
1	3. The method of claim 1, further comprising:				
2	determining if the requirements for the stability study have been completed;				
3	and				
4	if the requirements have not been completed, outputting an interface for				
5	additional input information for the requirements that have not been completed.				
1	4. The method of claim 1, further comprising:				
2	determining if approval from a user is needed for the input information.				
1	5. The method of claim 4, further comprising:				
2	receiving an indication of approval from the user; and				
3	storing the indication.				
1	6. The method of claim 5, wherein the indication comprises at least one				
2	of an electronic signature and captured signature.				
1	7. The method of claim 5, further comprising:				
2	receiving an indication from the user of disapproval;				
3	determining requirements that need to be completed for approval; and				
4	outputting an interface needed to complete the determined requirements.				

PATENT ORACLE CONFIDENTIAL Attorney Docket No.: 021756-002300US

1	8.	The method of claim 1, wherein the one or more interfaces include an		
2	interface for a stage in	a plurality of stages in the stability study.		
1	9.	The method of claim 8, wherein the plurality of stages comprise at		
2	least two of a stability	study setup criteria, stability study planning criteria, initial sampling		
3		ability study launch criteria, stability study testing criteria, and stability		
4	study evaluation crite			
	-	and a second sec		
1	10.	The method of claim 1, further comprising outputting information		
2	summarizing the stability study.			
1	11.	The method of claim 1, further comprising determining a result of the		
2	stability study.			
1	12.	The method of claim 11, wherein the result is inputted by a user.		
1	13.	A computer implemented method for managing a stability study, the		
1	method comprising:	A computer impromented assume 2 C		
2	(a)	determining a criterion in a plurality of criteria needed to complete the		
3	stability study;	determining a error in a primary		
4 5	(b)	outputting information for one or more requirements for the criterion;		
6	(c)	receiving information needed to complete the one or more		
7	` '	criterion based on the information outputted;		
8	(d)	validating the received information to determine if the one or more		
9	requirements are sati			
10	(e)	if the one or more requirements have been satisfied, repeating steps		
11	• • •	iteria in the plurality of criteria until the plurality of criteria have been		
12	completed.	The first the plantage of the first terms of the fi		
12	completed.			
1	14.	The method of claim 13, wherein the plurality of criteria comprise at		
2	least two of a stability study setup criteria, stability study planning criteria, initial sampling			
3	and testing criteria, stability study launch criteria, stability study testing criteria, and stability			
4	study evaluation cri	teria.

ORACLE CONFIDENTIAL Attorney Docket No.: 021756-002300US

1		15.	The method of claim 13, further comprising storing the received			
2	information.					
1		16.	The method of claim 13, further comprising:			
2		detern	nining if the requirements for the criterion have been completed; and			
3		if the	requirements have not been completed, outputting information needed			
4	for the requirements that have not been completed.					
1		17.	The method of claim 13, further comprising:			
2	determining if approval from a user is needed for the criterion.					
1		18.	The method of claim 17, further comprising:			
2	receiving an indication of approval from the user; and					
3	storing the indication.					
1		19.	The method of claim 18, wherein the indication comprises at least one			
2	of an electronic signature and captured signature.					
1		20.	The method of claim 17, further comprising:			
2		receiving an indication from the user of disapproval;				
3		deterr	mining requirements that need to be completed for approval; and			
4		outpu	atting an interface needed to complete the determined requirements.			
1		21.	The method of claim 13, further comprising storing at least a portion of			
2	the received information.					
1		22.	The method of claim 13, further comprising outputting information			
2	summarizing the stability study.					
1		23.	The method of claim 13, further comprising:			
2		receiving specifications for establishing the stability study; and				
3		gene	rating the plurality of criteria based on the specifications.			
1		24.	The method of claim 13, wherein validating the received input			
2	information comprises validating the received input information against business rules that					
3		define whether input information is acceptable.
